Why choose a managed service?

Managed Service

- No hardware or software to buy
- Keeps malware outside network
- Scalable
- No ongoing maintenance costs

Key Advantages

- Removes the MX record broadcast, shielding your network
- Reduces bandwidth, storage costs
- No upgrades or maintenance
- IT staff is free to do other duties
- Provides benefits for both SMB and large Enterprise

Appliance

- Hardware bought and installed on site
- Scaling requires more hardware
- Requires constant, daily attention from internal IT resources
- Capital expense
- Ongoing annual maintenance costs

Software

- Email threats battled inside the firewall, inside the network
- Small scale, often "free"
- Spam detection not as effective
- Focused on consumers, not business
- Capital expense
- Ongoing annual maintenance costs

Service Bundles

Key Selling Points: Service Bundles

- Single vendor for multiple online security services
- Comprehensive protection against blended online threats
- Unified management experience
- Best value for the dollar
